Open Grant Proposal: `vArtisans`

vArtisans:

Proposal Category: `app-dev`

Proposer: Shuo Pang

**Do you agree to open source all work you do on behalf of this RFP and dual-license under MIT and APACHE2 licenses?: `Yes`

Project Description

This is an VR platform desiged for oculus quest, that allow artist drawing in 3d space then upload their articles to filecoin to have encrypted identification, in this your article will have their own value as realistic.

You can select the painting brushes, colors, patterns as you wish to start your creation, you can also browse your's and other one's gallery as in reality, continue your creation is it was not done before, and also buy other one's articles to build your own art collection. All of articles that uploaded to cloud will have it's own unique identification which encryped by filecoin, will make your creation valued!

Value

For each articles should have their own value as in reality, in our VR platoform we store articles as a file, so with filecoin can make it happen!

- What are the benefits to getting this right? With this we can make a platform that make virtual art valuable!
- What are the risks if you don't get it right? Loses some of my time.
- What are the risks that will make executing on this project difficult? As far as I am seeing right now, there's no technical challenages, maybe have some diffcultes on marketing but we will publish it at Oculus Store so hopefully helps.

Deliverables

A VR applicaitoin which able run at Oculus Quset 1 and 2, will allow artists painting/sculpting/drawing in VR space with many brushes, colors, patterns, and store articles to a file which will be encryped by filecoin.

Development Roadmap

Milestone No.	Milestone Description	How Many People Invovled	Funding Needs	Estimated Timeframe
1	Prototyping	1	$3000	4 weeks
2	Main Function Implementing Polishing	1	$2000	8 weeks

3	User Experience	1	$2000	4 weeks

Total Budget Requested

USD 7000 for total

Maintenance and Upgrade Plans

Make more way to inspire artisans, and collect feedback to continuesly improve our product.

Relevant Experience

I have years of experiences on design and develop on VR/AR/MR/HCI/Game field, you can visit my youtube channel: https://www.youtube.com/channel/UCLD570AMpZspz5-RueCA1-Q

Filecoin for me is a good practice in encrypto field, I think with fabilous VR experience and valued articles, able to greately motivate artisans or ametures create their own works on my platform.
